

Corporate All Access Pass

Overview and Product Information

INE's Corporate All Access Pass is a subscription service designed exclusively for companies and organizations seeking complete, quality IT training for their engineers, system administrators, and other technical employees.

Features

Simple, subscription-based licensing model that includes INE's entire library of videos and workbook-based training content

- 1,000+ hours of video training content in online streaming format
- 7,000+ pages of practice lab scenarios and solutions guides
- Content added and updated frequently

Customizable licensing options for any size organization

Live online classes and webcasts included for no extra charge

Individual, transferrable licenses

Benefits

Low per-user cost

Access to a broad range of IT network training

A complete "technology knowledgebase" for your staff

Unlike traditional e-learning platforms that require you to select and purchase course materials individually, INE's Corporate All Access Pass provides the flexibility and freedom of unlimited access to our entire online training library for all licensed users. Users may tailor their training to their individual professional and career needs.

Our Training

- INE has been the industry leader in Cisco certification training solutions (CCIE, CCNP, CCNA, and more) for more than 10 years. We are also expanding our offerings to a broader networking audience, beginning with training for popular technologies such as Wireshark, OpenFlow, and CompTIA—with much more to come. Your sales representative can provide detailed information about our current and planned training library.

- Your subscription is truly all inclusive. Because our training licenses are subscription based, *all* new video training and workbook content published by INE during your active subscription is automatically added to your account!

Our Licenses

- When you purchase a corporate account for your team or group, you will designate one or more Account Administrators who can assign your purchased individual licenses to each user.

- When a user no longer requires use of the license (if they have completed the training or leave your organization), Account Administrators may transfer any remaining time left on the license to another end user for no extra charge, ensuring maximum use of each license.

Access to Content

Each user receives a personal INE Members account that provides access to all training content. Video courses are streamed directly through the browser, and workbook material is delivered in an online format as well as via optional PDF download. All content is portable and tablet-compatible, allowing access from anywhere with an Internet connection. Video courses may be downloaded for offline viewing for an additional fee.

Pricing and More Information

As low as \$499 per user per year!

Budget-friendly, customizable license packages are available to suit any organization, whether you need 5, 10, 20, or 100+ licenses. For more information and product pricing, see <http://www.ine.com/corporate-training-packages.htm>, or email corporatesales@ine.com if you are not yet already working with a sales representative.
